

Ghazi Gharsallah

+1-438-834-3591 | gharsallahghazi@gmail.com | LinkedIn | Google Scholar

Profile

Ghazi is a motivated and research-driven Ph.D. student at ÉTS Montréal with expertise in Artificial Intelligence (AI), 6G vehicular networks (V2X), and multimodal data analysis. He is proficient in advanced AI techniques, with hands-on experience deploying AI solutions across diverse industries. Ghazi contributes to innovation in next-generation network management and AI-driven technologies, particularly in digital twin and multimodal collaborative perception AI solutions for 6G V2X network management decisions and radio resource management.

Research Interests

Deep Learning, Artificial Intelligence, V2X, 6G, Vision Transformers, Multimodal Collaborative Perception.

Experience

ÉTS Montréal

Teaching Assistant

Jan. 2024 – Present

Montréal, CA

- Conduct laboratory and TP sessions for ELE462 (S24, H24), ELE452 (S24).
- Animate a conference about AI for ELE767.

JACOB

AI Research Intern

Oct. 2022 – Feb. 2023

Montréal, CA

- Built a data-driven property valuation solution for the real estate industry using Deep Learning during a Mitacs Accelerate internship.

KinHub

NLP Engineer

Jan. 2021 – Aug. 2021

London, UK

- Built a RASA chatbot for health care support, automated data collection process using scraping techniques, built NLP models, deployed NLP models and AI features.

University of California Irvine

Visiting Student

Feb. 2020 – Jul. 2020

Irvine, USA

- Worked on AI classifiers' robustness to adversarial attacks as my bachelor graduation project, analyzing the vulnerability of DL models to different attacks and proposing effective solutions, under the supervision of Pr. Zhiying WANG.

Mentor Graphics

AI Research Intern

Sep. 2019 – Jan. 2020

Tunisia

- Worked on graph partitioning problem optimization solution using deep learning for FPGA-based processor emulation.

AxeFinance

ML Engineer Intern

Jun. 2019 – Sep. 2019

Tunisia

- Built a credit decision-making solution using Machine Learning, specifically targeting the imbalanced data problem.

PwC

Data Science Intern

Mar. 2019 – Jun. 2019

Tunisia

- Proposed a machine learning-based customer satisfaction analysis and churn detection framework for a banking institution.

Education

ÉTS Montréal

Ph.D. in Electrical Engineering

Canada

Sept. 2021 – Present

- Digital Twin and Multimodal Collaborative Perception for 6G V2X Network Management Decisions and radio resource management, GPA 3.96/4.3.

McGill University

IUT MSc/PhD student

Canada

Sept. 2020 – Aug. 2022

- Courses: COMP 596: Network Science, ECSE 507: Optimization and Optimal Control, ECSE 610: Wireless Communications.

ÉTS Montréal

M.Sc. in Electrical Engineering

Canada

Sept. 2020 – Aug. 2021

- Wireless Communication, 6G V2X RRM, GPA 3.84/4.3.

École Polytechnique de Tunisie

Engineering Degree in wireless communication

Tunisia

Sept. 2017 – Aug. 2020

- Main courses: Stochastic Processes, Operational Research, Mathematical Optimization, Numerical Analysis, Data Analysis, Machine Learning, Signal Processing, Wireless Communication, Grade: 18/20.
