

Ghazi Gharsallah

+1-438-509-3088 • gharsallahghazi@gmail.com • LinkedIn • Google Scholar • Personal Website

Technical Skills

- Programming Languages: Python, R, C++, SQL, TypeScript, Angular
- Frameworks : TensorFlow, PyTorch, LangChain, Git, FastAPI, Databricks, AWS (Lambda, ECS), Snowflake.
- Areas of Expertise: Agentic AI, LLMs, RAG Pipelines, Multi-Agent Orchestration Systems, Transformers.

Work Experience

- Principal Agentic AI Engineer, CDPQ, Montréal, CA.** Jan. 2025 - Present
Leading development of multi-agent solutions and RAG systems integrating LLMs and tool use to automate financial workflows across multiple teams (LLM Agents, MCP Servers). Designing and deploying CI/CD pipelines.
- Teaching Assistant, ÉTS Montréal, CA.** Jan. 2024 - Present
Conducted labs and courses (ELE462, ELE452, ELE767), guiding students on implementing projects.
- AI Research Intern, JACOB, Montréal, CA.** Oct. 2022 - Feb. 2023
Built a data-driven property valuation system using ML-based encoders on real estate datasets.
- NLP Engineer, Kinhub, London.** Jan. 2021 – Aug. 2021
Developed and deployed production RASA chatbots and NLP recommendation systems using BERT and AWS, serving real end users in a regulated environment.

Education

- Ph.D. in Electrical Engineering, ÉTS Montréal** 2021 - 2025
Excellent distinction for both thesis and defense; nominated by jury for Institutional Excellence Award.
Thesis: Multimodal Collaborative MARL for 6G V2X Digital Twin.
- M.Sc. in Electrical Engineering, ÉTS Montréal** 2020 - 2021
Research: DL for Radio Resource Management in 6G V2X Networks. *GPA: 3.84/4.3*
- Bachelor of Engineering, École Polytechnique de Tunisie** 2017 - 2020
Main courses: Stochastic Processes, Mathematical Optimization, Data Analysis, Machine Learning, *Grade: 18/20.*

Selected Publications

- [2] G. Gharsallah and G. Kaddoum, "Multimodal Collaborative Perception for Dynamic Channel Prediction in 6G V2X Networks," in IEEE TMLCN (2025), [Paper Link]
- [1] G. Gharsallah and G. Kaddoum, "MVX-ViT: Multimodal Collaborative Perception for 6G V2X Network Management Decisions Using Vision Transformer," in IEEE OJCS (2024), [Paper Link] [Project Link]

Projects

- Datalith - Make Enterprise Data Agentic AI Friendly [Link]:**
Turns a company's scattered databases from different cloud data warehouses into one knowledge graph that AI agents can query safely.
- Sat Lab - Predicting Power Outages from Space [Link]:**
Uses satellite imagery and AI to predict where trees will bring down a power line, shown on a live digital twin.
- 3D Semantic Representation of Research Landscape [Link]:**
A 3D interactive map of IEEE papers, grouped by topic using embeddings, UMAP and HDBSCAN clustering.

Awards & Scholarships

- Mitacs Accelerate Fellowship, 2022 | Mitacs Globalink Research Award, 2019.
- ÉTS Montreal | Exemption from M.Sc. & Ph.D. Tuition Fees, 2020 - 2025.
- UCI (University of California, Irvine) | Visiting Student Fellowship, 2020.
- Tunisian Engineering Excellence Scholarship (Top 1%, 2017–2020).

Extracurricular Activities

- **YouTube Content Creator**, Productivity podcast host. Built 100k+ community 2023.
- **IEEE ÉTS Montréal Chapter**, Website manager, 2021.
- **Association des Jeunes Polytechniciens**, President, 2018.
